The chart shows both the vaccination rates (colored bars) and nonmedical exemption rates (grey bars) for each vaccine. These numbers may not total 100% if some children have medical exemptions, or are incomplete or in process with immunizations but do not need an exemption because they are on schedule.

School-Level Map

The maps show child care school locations with sites colored according to their immunization rate for all school-required vaccines. Use the filter at the top of the page to change the selected school; use the filter above the map to change the county. Hover over the school name to highlight the location on the statewide map; hover on the mapped school sites to see immunization and exemption rates for the school and county.

The safest schools are those with 95-100% of students fully vaccinated. The most vulnerable schools are those with less than 90% of students vaccinated. Sites with fewer than 10 children do not have data available.

- >=95% vaccination for all school required vaccines
- 90-94.9% vaccination for all school required vaccines
- <90% vaccination for all school-required vaccines
- <10 students

Notes: Data come from the immunization reports collected annually in March; for definitions, see "More Information" tab; Table footnotes: * Number of children enrolled in this site as of March; ** Additional children not included in enrollment number for whom immunizations are not required to be reported because their records are tracked by another site or attend fewer than 5 days per year; *** Additional children not included in enrollment number 18 months and under for whom immunizations are not required to be reported because of their age;**** Perc..
